NATO Allied Command Transformation
Joint Force Development Experimentation & Wargaming Branch 2023 Fact Sheet – Multinational All Domain Command and Control (MADC2)

Background: The Multinational Force Commander requires radically improved cross-national C2 system interoperability to counter peer and near-pear adversary capability. This is characterized by the need for increased:

- Allied / Partner investment in capabilities that improve data and information sharing compatibility;
- Allied / Partner's investment in capabilities that improve data-centric security of information; and
- Allied / Partner's alignment with C2 doctrines / processes / procedures required for unified operations.

This project will focus on existing Allied and Partner literature, development and acquisition actions, and doctrinal developments regarding C2 Systems interoperability

Aim: The deliverable is a Project Report that will describe key principles, initiatives, approaches, and applications that can accelerate implementation of improved joint multinational C2 systems interoperability.

WDI: Multinational All Domain Command and Control Validation aligns under Allied Command Transformation Warfare Development Imperative (WDI) – Cross Domain Command and Integrated Multi-Domain Defence.

Category: Multinational Capability Development Campaign 2023-24

Sponsors: FRA & USA
