NATO OTAN

Federated Mission Networking

A governed conceptual framework consisting of people, processes and technology to plan, prepare, establish, use and terminate Mission networks in support of federated operations.

FMN framework includes all people, processes and technology necessary to operate federated Mission networks.

FMN provides the mechanism to collectively verify and validate the interoperability of national capabilities.

FMN enables NATO and Nations to connect forces for planning and executing missions.

KEY BENEFITS

1. One Mission, One Information Domain.
2. Day Zero Interoperability.
3. Day One Connectivity.
4. Real-time Mission Adaptability.
5. Retain Affiliate Asset Command & Control.
