

RFI:

RFI-ACT-SACT-23-134 –Political Military Assisted Decision Making (PM-ADM))

Reference:

Q & A #1

Date of Issue:

05 December 2023

The following questions were raised with respect to subject **RFI-ACT-SACT-23-134 - Political Military Assisted Decision Making (PM-ADM)**. Responses are to provide clarification.

Questions	Responses
1. As we had before also engaged towards PM-ADM requests for information (early FY2023) and equally to the opportunity for commercial proposal towards a working prototype (mid FY2023), we would like to inquire whether our previously supplied information, and even specific proposal, will be considered in your further advancements in this CPP initiative.	1. Yes, you will be considered in our future advancements in the CPP initiative.
2. Assuming positive response to the above question, and while considering the now published Questionnaire, which aspects and/or specific questions the team would like to see developed beyond already provided information (i.e. specific questions where collected information to-date would still benefit from more detailed elaboration)?	2. The questions in the current RFI are based on the findings of the CRB work, hence, show a more advanced understanding of the programme. We would appreciate an answer from you with a more detailed elaboration.
3. Obviously, if the team feels the Alliance would be best served by re-articulating/updating as required detailed and complete/comprehensive answers across all questions, please feel free to indicate as such. We do believe this would lead to significant redundancy with information already shared, and may even obscure more recent advances made in this domain.	3. It is of course up to you to determine, which are the areas where you want to elaborate in more detail and which answers you refer to in previously shared information.
