

# **GLOBAL PROGRAMMING**

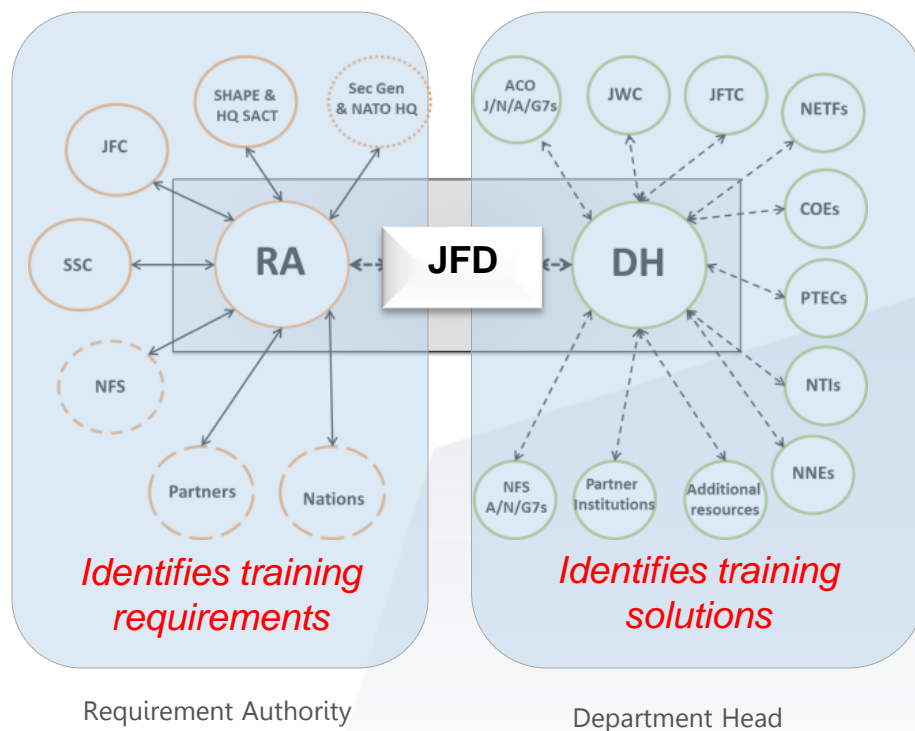

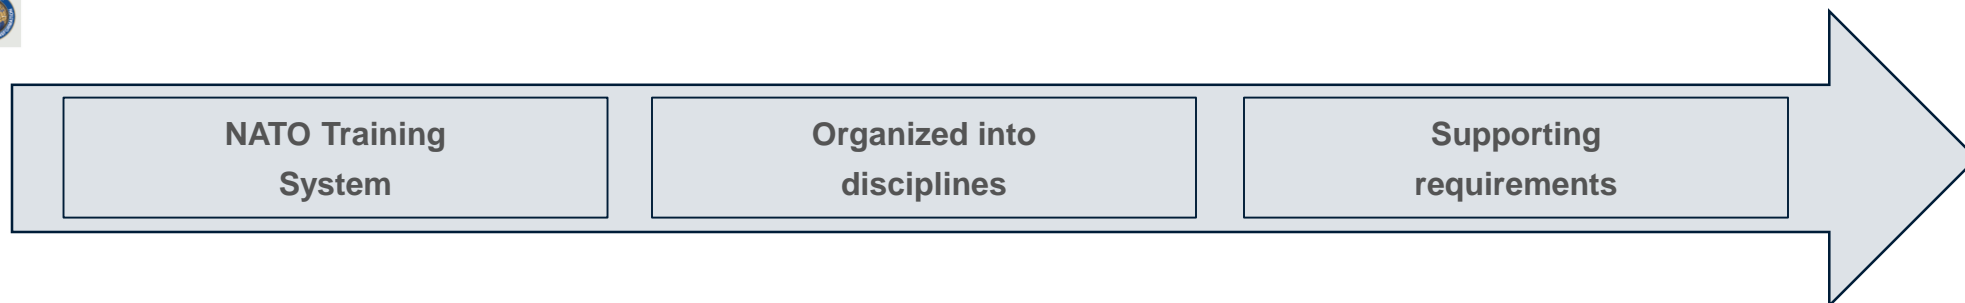

## **NATO Training System**

**HQ SACT / Joint Force Development / Education Training Plans and Programmes Branch**

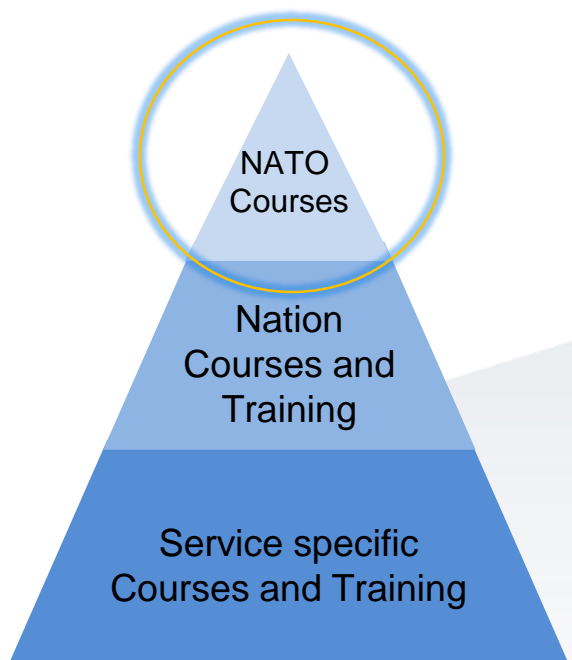

## NATO's E&T System

- The purpose of NATO E&T is to enable the Alliance to collectively cope with the multitude of threats and challenges across the spectrum of conflict.
- The aim of Global Programming as the approach to NATO E&T is to develop **effective, efficient and affordable** E&T solutions.

- ✓ *RA (usually SHAPE) identified a training requirement from exercise lessons learned or gap.*
- ✓ *DH finds a training solution from NATO Accredited Center of Excellence, Partner Training Education Centers (PTEC), or NATO / National / Multinational Education Training Facilities.*
- ✓ *Joint Forces Development oversees the process by ensuring courses have required documentation for approval, annual guiding documents are updated, and courses remain active and available to NATO.*

# Participation in Global Programing

## Training Resources

- NATO courses to support individual training across the Alliance above the national level

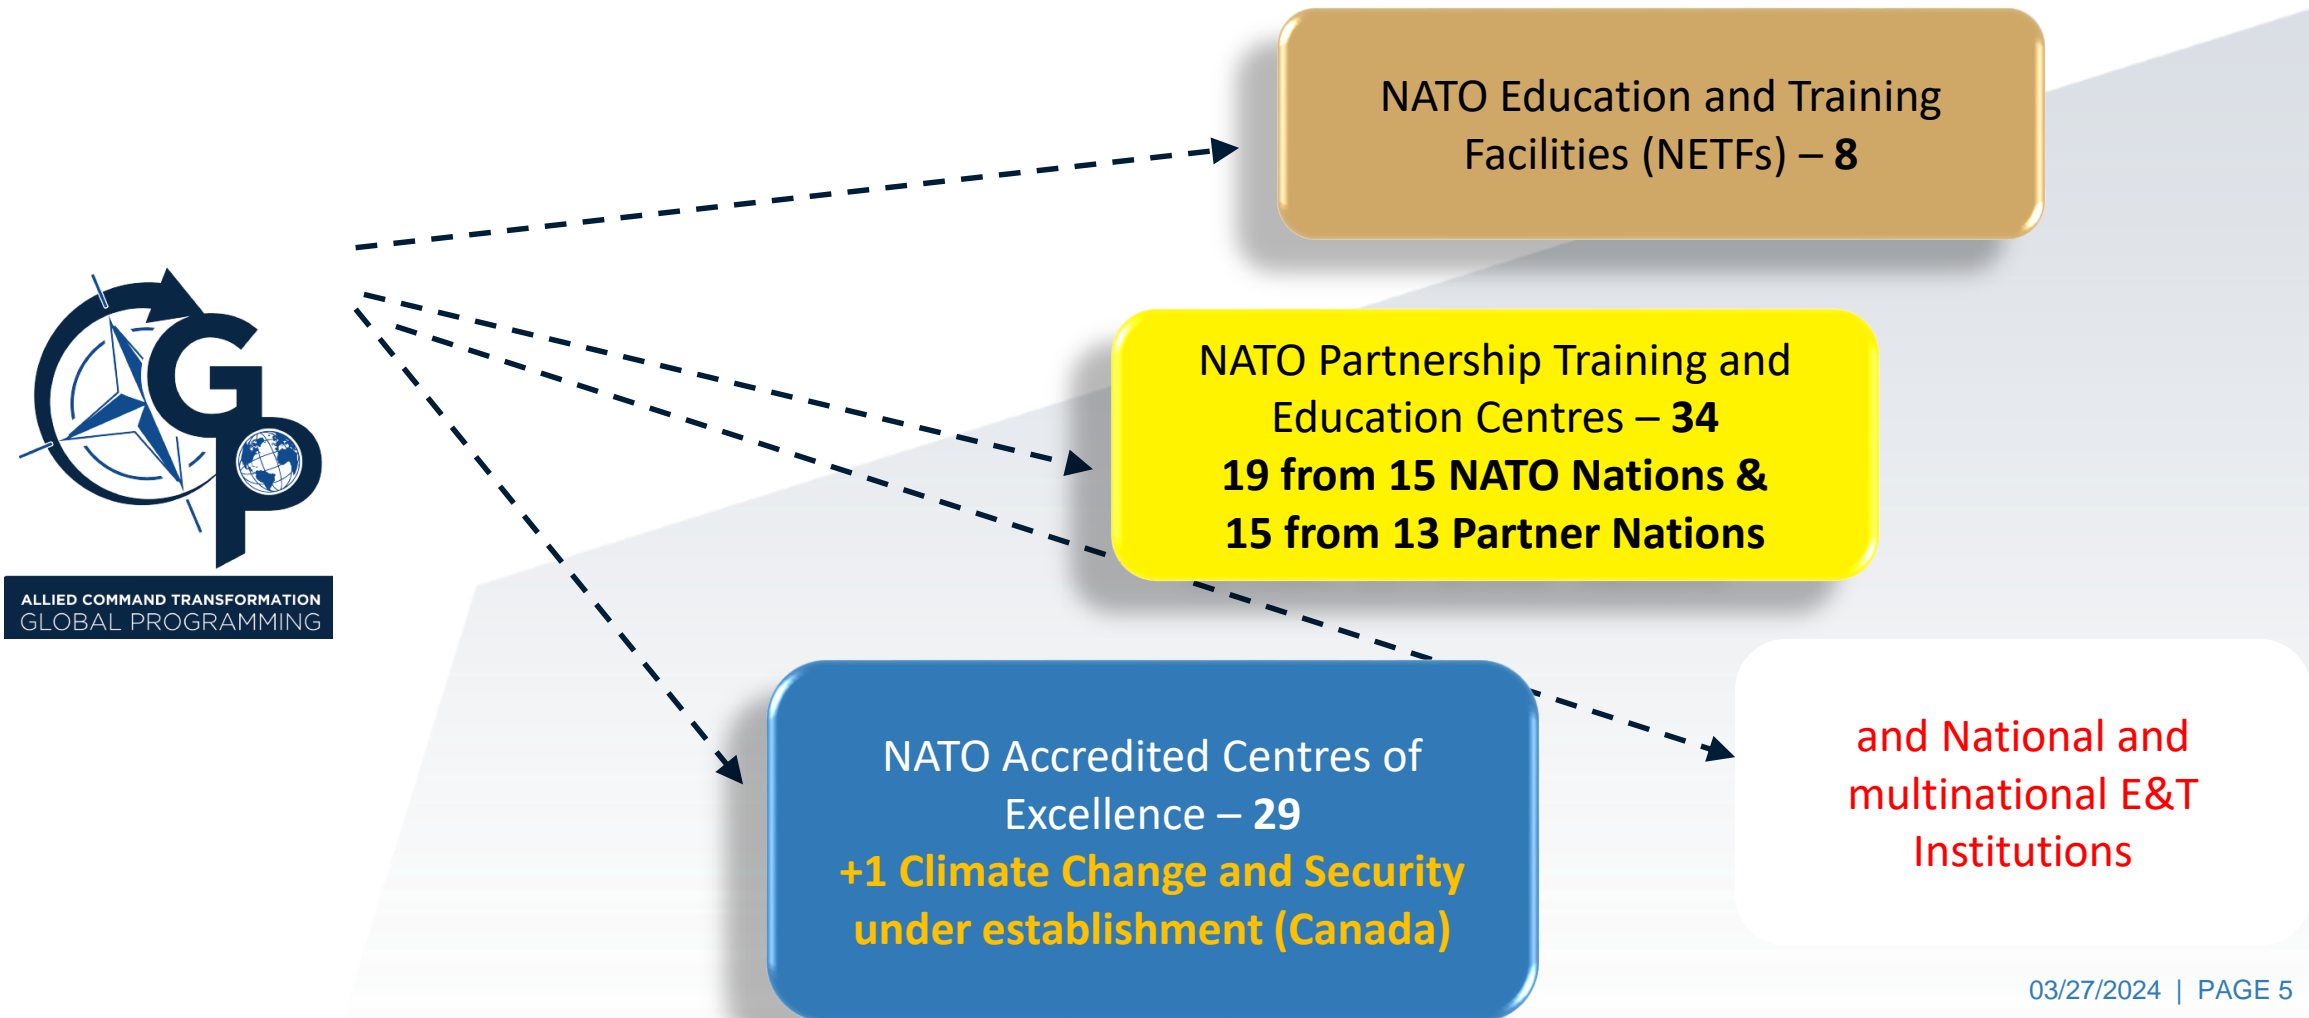

## Organizational Funding

- Monetary support to delivery of NATO approved courses

## Strengthen the Alliance

- Attend courses to increase readiness and interoperability across NATO

# Global Training Reach

# Access to courses

- NATO electronic-Individual Training and Education Programme (e-ITEP) and Education and Training Opportunities Catalogue (ETOC): <https://e-itep.act.nato.int/>
